13. Write a query to get the number of students and parents.

```sql

-- 13. Write a query to get the number of students and parents.

SELECT
    SUM(IsParent = 'Y') AS total_parents,
    SUM(
        IsAdmin = 'N'
        AND IsParent = 'N'
        AND IsPrincipal = 'N'
        AND IsTeacher = 'N'
    ) AS total_students
FROM STUDENTS;

```

Output:

+ Options

total_parents	total_students
13122	96865

14. Write a query to get total no of logins by free parent and teacher user.

```sql

-- 14. Write a query to get total no of logins by free parent and teacher user.
SELECT COUNT(s.studentID) AS total_logins
FROM STUDENTSESSIONS s
JOIN FREETEACHERACCOUNTS f
    ON s.studentID = f.studentID
WHERE f.UserType IN ('teacher', 'parent');

```

Output:

total_logins
428745

15. Find the count of active parent subscriptions by plans (monthly, yearly, and yearly basic plans)

```sql
-- 15. Find the count of active parent subscriptions by plans (monthly, yearly, and yearly basic plans)
SELECT
    item_name AS plan,
    COUNT(*) AS total_active_parents
FROM Stripe_Transactions
WHERE UserType = 'parent'
AND AccountStatus = 'Active'
GROUP BY item_name;

```

Output:

plan	total_active_parents
1-year-plan	27
	2
3-month-plan	8
plan	815
StepUp Yearly	1
